

## Afternoon Clubs 2018/2019

### Rhythm club (3+)

**Teacher: Marie Lenka Novotná**

A sense of rhythm is an essential skill, which is closely related to speech development. Rhythm is one of the key audio elements from which speech is built, and the preschool age is an important time in the child's life for building a good basis for this ability. Accompanied by an African drum, during lessons, children learn about their body and movement in space, through rhymes, folk songs, and games. Other activities also include dancing and playing musical instruments, both tools for the development of fine and gross motor skills.

### Outdoor club (4+)

**Teacher: Andrew Flach - 500 CZK per month**

In this electronic, internet age, when more and more children are leading sedentary lives, the principal goal of Outdoor Club is to take them outside to engage nature, pursue sport and participate in a variety of manual arts. Essentially, it is intended to be a return to an older, slower and simpler but abundantly fruitful mode of living and amusement. The knowledge and skills once a common inheritance to our ancestors have become rarities in many quarters. Yet they are more than worthy of our consideration and passing on to our youth for the yields they afford in self-sufficiency and personal satisfaction.

### Spanish club (3+)

**Teacher: Yana Skalicka**

The knowledge of languages is one of the most important tools a person can have!! And the best way to learn a new one, is to enjoy and have fun during the learning process! During the Spanish lessons the children sing, dance, cook, play group games, learn traditional acting songs, and make crafts. All of this in a very easy way, in order to get the best from your children! Every week, the kids will get to take all their projects, songs and recipes home!!

### Ballet (4.5+) Taneční školička Ivy Cenkové - 500 CZK per month

**External teacher**

This club is organized by the Iva Cenkova Dance school (Taneční školička Ivy Cenkové) which specializes in dance and ballet lessons for kids of pre-school and school age. The lessons focus on the children's general movement development and dance skills. The school cooperates with many teachers from the dance industry as well as the National Theatre, so the programme can help your child be accepted to Music school. The main aim of the lesson is for the children to have fun and look forward to it every week.

**Little Bobs (4+) Brainobrain ([website](#)) 1250 CZK per month**  
**Veronika Kadlecová**

Based on your interest we are bringing Brainobrain to our kindergarten. Brainobrain is one of the world's leading Children Institutes for self-empowerment. Brainobrain Czech is the first Children Academy in the Czech Republic, which is a unique skill development programme, where they nurture the children's brain to develop some of the foundation skills for learning such as:

concentration and focus, excellent numerical skills, self-confidence, self-empowerment, speed and accuracy, photographic memory, visualization, creativity, memory, learning ability, listening skills, and decision making. The club is led by our teachers trained by the Brainobrain master trainer.

**Active club (4+)**  
**teacher: Adéla Vardžáková**

The "Active Club" will be based on outside activities, but can also be moved inside depending on the weather. The children will develop various movement skills, learn how to follow instructions, and get to know their bodies better. This club can help your child learn how to use their energy (which children have tons of!) in a productive and positive way.

**Nature Explorer (3+)**  
**teacher: Jiřina Neudörflová, Adéla Vardžáková**

This club will have two age groups. Both will focus on theoretical and practical experiences connected with sciences (biology, physics, chemistry) and other fields. In a very kid-friendly way, our young scientists will explore and look after the garden, they will explore the local neighbourhood, and its flora and fauna. They will try to do playful and fun experiments, too. All of the topics will help them understand how the world around them works.

**Lego engineer 4+ Kiddum Exploration Centre for Kids**  
**([website](#)) - 600 CZK per month**  
**External teacher**

This programme is led by a trained LEGO Education instructor from the Kiddum education centre. Lego Engineer is a LEGO ® Education programme designed for kids to develop their knowledge of the world that surrounds them. Through special LEGO ® Education sets they find out how the human body works, how animals move and many other topics. The children get practical experience from solving problems, they develop attention and patience. During this course, kids begin to explore such areas of science as physics, mathematics, technology, design. In addition, kids develop the technical and expressive language skills, creative thinking and problem-solving skills, teamwork skills and cooperation.
